Helped create and maintain standardized CI/CD pipelines on GitHub for solution applications.

Migrated and refactored multiple repositories while keeping the git histories intact from Azure DevOps-based mono-repo to GitHub and replicated the CI/CD on GitHub Actions.

Developed and documented containerized application for providing UI-based access to Ansible scripts used in the organization with a text editor, terminal, and configuration panels using React, Flask and Ansible.

Obscured the source code of developed Python applications by creating executables using Nuitka.

Helped in promoting the development of containerized solutions and developing coursework to encourage the usage of logging and monitoring.
